Subject: Brief notes from Thursdays " Check-In ron Roll Out of National PFAS Data Explorer

Andrew Stoeckle and I were on the call and Andrew had a number of topics he wanted to share. I am repeating the highlights of those discussions here, but hope that Andrew will jump in with any corrections or information I am missing.

- Most of the places of interest are ready to go. Mostly MPL sites, all posted for this week's Places of Interest call. Folks will need to review and provide any updates. Also a few records are missing some critical informations.
- They are working on the QAPP and holly has been very helpful. Focused on getting first part, places of interest, completed to address issues of secondary data, data quality, etc. Will complete other sections of the QAPP after approval that the initial section.
- Want to move system to public space but hide URL to test performance. Need approval to move forward with that.

Thanks.
